

Entrepreneurship Management Cell (EMC)

The Entrepreneurship Management Cell (EMC) is a strategic initiative designed to kindle ideation, cultivate innovation, and drive entrepreneurial leadership across the student community. Serving as an active collaborative platform, the EMC enables aspiring entrepreneurs—as individuals or teams—to discuss ideas, present proposals, and interact with mentors and industry stakeholders. By offering valuable stakeholder inputs, strategic direction, and structured guidance for launch, the cell equips students to transform early-stage concepts into viable startup enterprises.
